Wamumbi Foundation website: officials' manual

Nov 11, 2026 · @Lewis Magangi

Welcome

This manual shows each Wamumbi official how to use the website and its dashboard for their role. The public site is at **https://wamumbi-red.vercel.app** (a permanent web address is coming; the dashboard works the same there).

The website has two sides:

- **The public site**: what everyone sees. Our story, events, the photo gallery, campaigns, the M-Pesa donation page, and the volunteer and partner forms.
- **The dashboard**: where officials run the foundation's work. You reach it by signing in. What you see there depends on your role, so you only see the parts that are yours.

Read *Getting started* and *Roles at a glance* first, then the section for your own role.

Getting started

Everyone starts with an account; a Super Admin then gives you your role.

1. Go to the website and click **Sign in** (top right), then **Sign up**. Use Google or your email address. Use the email address you want the foundation to know you by.
2. Confirm your email with the code you're sent.
3. You land on the **dashboard**. New accounts start as **Donor**, so at first you'll only see your own giving.
4. Tell the Super Admin (Lewis) the email you signed up with. They set your role in **Admin → Users & roles**.
5. Reload the page. The sidebar now shows the parts of the dashboard for your role.

Finding your way around the dashboard

- **Sidebar (left)**: everything you can open, in three groups: *Workspace* (campaigns, donations, volunteers, teams, projects, events, reports), *Content* (photos, moderation, inbox, approvals) and *Admin*. On a phone, tap the menu icon at the top left.
- **Bell (top right)**: your notifications. A red number means something new: an item waiting for your approval, a new volunteer application, someone registering for your event, or a decision on something you submitted. Click one to go straight to it; **Mark**

all as read clears them.

- **Sun/moon icon**: switches between dark and light themes.
- **View website**: back to the public site.
- **Your name (bottom of the sidebar)**: **Manage account** changes your name, email, password and sign-in methods. The arrow icon signs you out.

If a page says *You don't have access to this page*, your role doesn't include it. Ask the Super Admin if you think it should.

Roles at a glance

There are nine roles. Each sees only the parts of the dashboard it needs, and the website enforces this on its server, not just by hiding buttons.

Role	Main work	Needs approval?	Cannot
Super Admin	Everything: roles, approvals, activity log, partner inquiries	No	Nothing is off limits
Campaign Manager	Create and edit campaigns, upload posters, add campaign categories	Yes, new campaigns	See donor phone numbers or emails; record donations
Event Coordinator	Create and edit events, see registrations, coordinate volunteers for events	Yes, new events	See any donation money
Volunteer Coordinator	Volunteer applications (Inbox), add and edit volunteers, teams and projects	No	See any donation money
Finance Manager	Record M-Pesa donations, all donations and donor contacts, reports, CSV exports	No	Create campaigns or events
Content Manager	Review uploaded photos before they go public	No	See donations or volunteers

Role	Main work	Needs approval?	Cannot
Team Leader	Their own team: its members, registrations and projects	No	See other teams
Volunteer	Register for events, upload photos (reviewed first), see the team	No	See contact details or money
Donor	Their own donations and event registrations	No	Anything else in the dashboard

“Needs approval” means a new campaign or event is saved as *pending review* and only goes on the public site once the Super Admin approves it. Every role can upload photos except Finance Manager and Donor.

Super Admin

The Super Admin gives everyone their role, approves what goes public, and can see the full activity log. Everything in the other sections is open to you too.

Give someone their role (Admin → Users & roles)

1. Ask them to sign up first (see *Getting started*).
2. Search for their name or email.
3. Pick their role from the dropdown next to their name. It saves straight away; they see the change on their next reload.
4. Give each person the narrowest role that covers their work. Keep Super Admin to one or two trusted people.

Approve campaigns and events (Content → Approvals)

Campaign Managers′ new campaigns and Event Coordinators′ new events wait here. The bell tells you when something arrives.

- **Approve and publish** puts it on the public site, and the person who submitted it is notified.
- **Send back** returns it to draft so they can fix it. Tell them what to change.

Your own campaigns and events go live without approval.

Partner inquiries and volunteer applications (Content → Inbox)

Every form sent from the website lands here, so nothing is lost. Open one to see the details, reply by email or phone, then mark it *In review*, *Accepted* or *Declined*, or *Archive* it. Only the Super Admin sees partnership inquiries; the Volunteer Coordinator also sees volunteer applications.

Activity log (Admin → Activity log)

A record of who did what and when: role changes, approvals, photo reviews, recorded donations, inquiry decisions and project changes. Filter by type of action, or **Export CSV** for your records.

Campaign Manager

You create the campaigns donors give to; the Super Admin approves each one before it goes public.

Create a campaign (Workspace → Campaigns → **New campaign**)

1. **Title** and **What it's for**: what the money pays for, in plain words. Donors read this on the Campaigns page.
2. **Goal** and **Currency** (usually KES).
3. **Category**: pick one, or click **Add a category** to make a new one (for example *Medical support*).
4. **Urgency**, **Starts** and **Ends** (leave *Ends* empty for an open-ended campaign), and **People it will help**.
5. **Poster or cover image**: click **Choose an image** and pick a JPG, PNG or WebP up to 10 MB. It shows on the public Campaigns page.
6. Click **Submit for review**. The campaign shows as *pending review* in your list, and the Super Admin is notified. When it's approved, the bell tells you and it appears on the public site.

Track progress

The Campaigns page shows active campaigns, the total raised against their goals, and anything in draft or review. Search or filter by status, and click any campaign to see its progress, number of gifts and donors, and its recent gifts.

To change a campaign, open it and click **Edit campaign**. You can update its details, poster, goal and end date, or mark it *completed* when it's fully funded.

You see donors' names but never their phone numbers or emails; those stay with Finance. Donations are recorded by the Finance Manager and count towards your campaign straight away.

Tip: gifts that aren't for one campaign need somewhere to go. Create a campaign called **General fund** once and leave it open.

Event Coordinator

You plan outreach days and visits, open registrations, and see who's coming; the Super Admin approves new events before they go public.

Create an event (Workspace → Manage events → **New event**)

1. **Title** and **Description**: what happens, who it's for, what to bring.
2. **Date**, **Start time** and **Places** (how many people can register).
3. **Registration closes** (optional): leave it empty to keep registration open until the event is full.
4. **Category**: pick one, or **Add a category** (for example *Children's home visit*).
5. **Ticket price**: 0 for a free event. For a paid event, people register on the website and pay with M-Pesa (see below).
6. **Event poster**: click **Choose an image** to upload it. It shows on the public event page.
7. Click **Submit for review**. Once approved, it appears on the public Events page and people can register.

See who's coming

The page shows upcoming events by default; switch to **Past** for earlier ones. Each row shows places taken out of the total. Click an event to see the full list of registrations with names and emails. The bell tells you each time someone registers.

Change an event

Open it and click **Edit event**. You can change any detail, the poster, or the **Status** (for example *cancelled* or *completed*). Making an event live again sends it back for approval.

Paid tickets

When someone registers for a paid event, the website shows them how to pay: Lipa na M-Pesa → Buy Goods, till **8392352**, the ticket amount. Their notification repeats this. Ask them to keep the M-Pesa message; check it at the door. Online card payments are planned for later.

After the event

Upload the photos under **Content → Photos** and choose this event (see *Photos*). Once approved, they appear on the event's own page.

Volunteer Coordinator

You bring new volunteers in and keep teams and projects moving.

New applications

When someone fills in the *Volunteer* form on the website, the bell tells you. Open **Inbox** to read the application, then reply to the person by email or phone.

Add a volunteer

Go to **Volunteers** and click **Add volunteer**. Fill in their first and last name, email, phone, availability (for example *weekends, school holidays*) and an emergency contact, then save. Click any volunteer to update their status or availability.

Projects

Under **Projects**, click **New project**: title, description, status, progress (%), start and end dates, team, linked campaign, and budget with currency. Click **Create project**. Open a project and click **Edit project** to update its progress or status. Budgets are only visible to team managers and finance.

Teams (Workspace → **Teams**)

1. Click **New team**. Give it a **name**, say **what the team does**, and pick a **category** (or **Add a category**, for example *Outreach*).
2. Choose the **team leader** and, if you like, a **member limit**. Click **Create team**.
3. Ask the Super Admin to give the leader the **Team Leader** role in *Users & roles*, so they can manage their team.
4. Click the team to open it. Under **Add a member**, choose a person, give them a role in the team if useful (for example *Driver*), and click **Add**. The **×** next to a member removes them.
5. **Edit team** changes the details, leader, member limit, or sets the team *Inactive* when it stops meeting.

Finance Manager

You keep the money records right. Donations through the website are paid to the M-Pesa till; you record each one so totals and campaign progress stay accurate.

Record a donation (Finance → Donations → **Record donation**)

1. The donor's **first and last name**, **email** and **phone**. Tick **anonymous** if they don't want their name shown.
2. **Campaign** (required). Tip: keep a *General fund* campaign for gifts that aren't for a specific cause.

3. **Amount** and **Currency** (KES is the default).
4. **Paid with** (M-Pesa is the default) and the **M-Pesa or receipt code** from the message.
5. Any **Notes**, then save. The campaign's raised amount updates straight away, and the entry is written to the activity log.

Check and export

The **Donations** list shows every gift with its payment reference. Use the search and filters, then **Export CSV** to open it in Excel or Google Sheets. Match the codes against your M-Pesa statement each week.

Reports

Under **Reports**, download the campaign performance CSV: goal, raised, donors and progress for each campaign. Use it for board meetings and donor updates.

Content Manager

You make sure every photo on the website is appropriate, consented and described.

Review photos (Admin → **Moderation**)

The bell tells you when photos are waiting. For each one:

1. Check the photo is clear, respectful, and right for a public website.
2. Confirm the uploader ticked the consent box. Where children are shown, the foundation must have the guardian's permission.
3. Write the **alt text**: one short sentence describing the photo for people using screen readers (for example *Volunteers serving lunch at the children's home*).
4. Click **Approve**, or **Reject** with a short reason. The uploader is told either way.

You can't approve a photo without alt text and confirmed consent. Approved photos appear on the event's page and in the Gallery.

Your own uploads are approved automatically, so still check them before you upload.

Team Leader, Volunteer and Donor

Team Leader: open **Teams** and click your team to add or remove members (you can pick from registered volunteers) and edit its description or member limit. Under **Projects**, update progress and status on your team's projects. You can't change other teams or see budgets.

Volunteer: your dashboard shows upcoming events you can register for (including paid ones, which you pay through M-Pesa), events you've registered for, and your notifications. You can upload photos from events you attended (see *Photos*).

Donor: anyone can give without an account. If you do have an account, **Your giving** shows the gifts recorded under your name.

Photos

Upload (Content → **Photos**)

1. **Choose the event**: pick from *Events on the site* or *Past events (photo albums)*. This decides where the photos appear.
2. Add a short **caption**.
3. Tick the **consent** box to confirm everyone pictured (or their guardian) agreed to be shown.
4. Choose the images and upload.

Volunteers can upload up to 10 photos a day, 10 MB each.

Review: uploads go to the Content Manager for approval; you get a notification when each is approved or rejected.

Where they appear: on the event's own page (or the past event's album) and in the **Gallery**.

Good practice, privacy and getting help

- **Keep your account to yourself.** Don't share sign-ins; ask the Super Admin to add a new person instead.
- **Protect people's details.** Donor and volunteer names, emails and phone numbers stay inside the dashboard. Delete exported CSVs once you're done with them.
- **Children's photos** need guardian consent. When in doubt, don't upload.
- **Check before you approve or publish.** Everything public represents the foundation.
- **Everything is logged.** The Super Admin can see who did what under **Activity log**.

Getting help

Something not working or a role missing? Contact the Super Admin. Include the page, what you clicked and a screenshot if you can.
